

## LIP ENHANCEMENT WITH DERMAL FILLER

Lip filler injections are regarded as a very safe cosmetic procedure when performed by an experienced, trained aesthetics practitioner, like myself. Lip fillers for enhancing and correcting your natural lips is the most popular treatment at JR Body & Aesthetics.

While many people these days are aware of using dermal fillers to enhance the lips, there are many more options and perfected techniques that an experienced practitioner can utilize to enhance lips. Lip volume and size changes and reduces with age and we lose the natural volume we once had. Lip enhancement can not only help to gain or restore lip volume but can temporarily improve more mature lips by smoothing lines, hydrating and improving definition. Jemma is an experienced practitioner and can guide you to the best possible outcome.

### Choosing your product

We have a few favourite products for lip-enhancement. We use products specifically designed for the lip area such as Restyane Kysse, Teosyal RHA, Teosyal Kiss and Revolax. Product choice should be chosen for the specific client only and depending on what outcome they want to achieve. Product options can be discussed with your practitioner who can recommend the best option to suit you. We have strict criteria for the dermal filler brands that we choose; based on great results, client satisfaction, second-to-none safety, minimal downtime and maximum longevity.

Hyaluronidase Dermal Filler Removal & Correction

£200
